Professional Summary

Isabelle Cash is a full stack web developer with over five years of experience building high-performance, scalable web applications. She specializes in JavaScript technologies, particularly **React**, **Node.js**, and **PostgreSQL**, with a strong background in both front-end and backend development. Isabelle thrives in cross-functional teams, building intuitive user experiences while ensuring backend efficiency and security.

Currently a Software Engineer III at **Altura Web Solutions**, Isabelle leads end-to-end development for B2B SaaS platforms, mentors junior developers, and introduces scalable solutions through modern frameworks and clean architecture. She's passionate about clean code, accessibility, and empowering users through beautifully built digital products.

Core Skills

- **Languages & Frameworks:** JavaScript, TypeScript, React, Node.js, Express, HTML5, SCSS
- **Databases:** PostgreSQL, MongoDB
- **Dev Tools:** Git, GitHub Actions, Docker, Webpack, REST APIs
- **Design & UX:** Figma, Responsive Design, WCAG Accessibility Standards
- **Deployment:** Netlify, Heroku, Vercel
- **Soft Skills:** Mentorship, Agile Collaboration, Problem Solving, UI/UX Sensibility

Professional Experience

Software Engineer III

Altura Web Solutions – Austin, TX

Feb 2021 – Present

- Led full-stack development for enterprise-level SaaS platforms using React and Node.js.
- Architected reusable UI components, implemented REST APIs, and integrated PostgreSQL with Redis caching.
- Spearheaded performance tuning and code splitting for faster load times and SEO improvements.
- Introduced GitHub Actions workflows for CI/CD and streamlined deployment pipelines.
- Mentored junior devs and introduced internal React patterns library for team-wide use.

Tech stack: React, Node.js, Express, PostgreSQL, Redis, Docker, GitHub Actions

Full Stack Developer (Freelance)

Independent Consultant – Remote

Jan 2019 – Jan 2021

- Delivered 12+ client projects, from portfolio sites to fully integrated e-commerce dashboards.
- Built complete MERN-stack applications with Stripe payments, CMS (Sanity, Contentful), and custom admin panels.
- Handled end-to-end product lifecycle: wireframing, development, testing, and cloud deployment.

Key projects:

- A booking platform for yoga studios with calendar sync and payment integration.

- E-commerce site with real-time inventory dashboard and CMS-driven product content.

Tech stack: MongoDB, Express, React, Node.js, Stripe, Netlify, Heroku

Front-End Developer (Contract)

Veridian Labs – Remote

Jun 2017 – Dec 2018

- Developed UI for a data analytics platform serving clinical researchers.
- Migrated legacy jQuery components to modern React architecture.
- Built interactive visualizations with D3.js and optimized performance for data-heavy pages.

Tech stack: React, Redux, D3.js, SCSS, Webpack

Education

Level	Degree	Year	Note
Bachelor's	B.S. in Computer Science	2016	University of Texas at Austin — Focus on Web Development & Human-Computer Interaction
Certification	Full Stack Web Development Bootcamp	2017	General Assembly (Austin Campus) — Immersive 12-week hands-on program

Projects & Open Source

- **StyleKit Components**
A personal library of accessible, responsive React components built with Storybook.
 - **Client Dashboard Boilerplate**
Open-source Express + React starter template with auth, logging, and role-based routing.
 - **Women Who Code ATX – Workshop Lead**
Created and led React workshop series for early-career devs in Austin.
-

Clients & Collaborations

Name	Company	Title	Note
Elena Rojas	Altura Web Solutions	Product Manager	Partnered on redesigning an enterprise client's customer dashboard.
Gregory Stone	Koma Creative	Founder / Design Lead	Built multiple front-end interfaces for marketing and e-commerce.
Jamie Brooks	Veridian Labs	CTO	Helped migrate a data-heavy medical research tool to React.
